

# NOOD PLASTIC

TUOTENUMERO

7138448

Especially suitable in environments with low water consumption or where unused for long periods. NOOD trap is a Purus invention and is a combination of water trap and mechanical odour trap to give twice the protection. A NOOD trap gives efficient protection against backwater, bad smells and vermin. The spring-loaded bowl always seals against the top part of the water trap. Available in plastic and stainless steel.

## TUOTETIEDOT

<b>Tuotenumero</b>	7138448
<b>Material</b>	Plastic (PP).
<b>Dimension</b>	For Purus gillies w. dimension Ø150.
<b>Colour</b>	White.
<b>Accessories</b>	Comes with locking ring that can withstand backwater pressure of 1 metre water column.
<b>Misc.</b>	The water trap is partly mechanical, which means it remains closed when there is no water flowing through it. In a closed position, it prevents bad smells from the drain if the water should evaporate. The water trap opens automatically when water flows through it. Incoming water runs into the drain.
